Tulip-Style Clamping

- ✓ Innovative clamp expands and contracts quickly
- ✓ Fast mounting with no damage to the wheel

Fast, Efficient, and Simple Controls

- ✓ Houses all user operations
- ✓ Pivots for easy access

Fast and easy demounting and mounting

Roll the wheel onto the carriage and move the carriage inward

Easy mounting shown using optional lever

- ✓ Loosen the beads using the rollers and lube.
- ✓ No hammers needed!

- ✓ Use standard aluminum or steel rim clamps to assist mounting.

- ✓ Quickly slide the carriage and spin the tire, rolling both beads off of the rim. It's that easy.

For many standard tyres, super-fast double bead mounting is possible.

Safety comes standard

The TCX625 functions close to the ground to keep heavy tyres at a safe height.

TCX625HD Paired with ForceMatch® Makes Match-Mounting Easy!

- ✓ Match the high spot of tire to low spot of rim
- ✓ Makes assembly as round as possible

When combining ForceMatch® wheel balancer (left) with a heavy-duty tyre changer (right), their match-mounting capability achieves the smoothest possible ride.

TCX630HD

Designed for mounting and demounting truck, bus, and heavy industrial vehicle tyres quickly, safely, and effortlessly, servicing rims with center grooves, ring rims, and with or without inner tubes

Hand Control

Foot Control

Portable Controls

- ✓ Incorporates all the operating controls and permits the operator to choose the ideal working position
- ✓ Very sensitive and allow you to perform even small movements in the most precise way minimizing risk to the tire and rim
- ✓ Special safety protection prevents accidental use of the controls
- ✓ For maximum user safety, unit utilizes 24-volt low-tension electric power and is waterproof

Bead Breaking Turning Arm

- ✓ Bead breaking and tire mounting/demounting tools are incorporated into a single patented turning arm
- ✓ Reduces need to constantly change tools
- ✓ Bead-breaking disk is mounted on special bushes enhancing operational smoothness and endurance

Self-centering Clamping Spindle

- ✓ Hydraulic powered, two-way, all-wheel clamping spindle
- ✓ Can clamp any rim from 14 to 26 inches either through the center hole or on the inside
- ✓ Four clamping jaws grip any type of wheel in any position without slippage

Moving Platform

- ✓ Makes handling of the tire simple and uncomplicated
- ✓ Wide range of the carriage movement
- ✓ Reduces tool positioning requirements which decreases work time

Safety Mechanisms

- ✓ Non-return check valve on the self-centering clamp and a non-return check valve on the lifting cylinder — prevents wheel from falling if hydraulic circuit accidentally breaks down
- ✓ Mechanical device prevents tilting of the tool holding arm when the tool is removed
- ✓ Equipped with overload thermal switches to protect against overheating risk

Mount and Demount with Ease

Tractor, implement, and other specialty wheel assemblies are serviced using the same tools and techniques on TCX630HD, TCX640/645HD, and TCX660HD models.

Position the wheel pliers and roll the first bead onto the rim. Reposition the pliers and roll the second bead on.

Bead loosening and demounting can be as easy as rolling the tyre off of the rim in a single step.

The standard hook tool is used to mount and demount tubed and super single tyres or more difficult-to-handle wheel assemblies.
